#### **EXPLANATION:**

This Special Action closes the watersheds of Blue Lake, Medvejie Lake, southern portion of the Katlian River and the Harbor Mountain/Indian River near Sitka, Alaska to the harvest of mountain goats.

**REGULATION:** 36 CFR 242.26(i)(13)(i) and 50 CFR 100.26(i)(13)(i) are amended to read:

Unit 4 - Mountain Goat

1 goat by State registration permit only.

The watersheds of Blue Lake, Medvejie Lake,  
South Katlian River and Harbor Mountain/Indian River

Aug. 1 - Dec. 31

Federal Subsistence Board by delegation to /s/Perry Edwards

Perry Edwards  
District Ranger  
Sitka Ranger District  
July 29, 2016

**JUSTIFICATION:**

Continued mountain goat harvest in these areas would be detrimental to the long term conservation of the mountain goat population in Unit 4.

A public hearing to discuss the 2016 Baranof Island Mountain Goat Management Plan was held on July 28<sup>th</sup>, 2016 in Sitka, Alaska. The ability to teleconference was provided so residents of other affected communities could participate. Members of the public who attended were not opposed to conserving mountain goats on Baranof Island through closures guided by the management plan. The 2016 management plan is similar to the 2015 plan with distinct male and female guideline harvest levels by zones on Baranof Island. Nanny harvest is more restrictive than billy harvest when applied to the guideline harvest levels. As the guideline harvest levels in each of the zones are reached, those zones will be closed to mountain goat harvest.

The remainder of Baranof Island will remain open for goat hunting unless closed by future special action.
